COVID Update | Pool Surveillance Testing Results

Jan. 22, 2021

Dear Campus Community,

The college recorded zero new COVID-19 cases from among the 543 pooled surveillance testing samples taken Tuesday. All samples were negative.

We have recorded five total cases over the past 14 days, three employees and two students.

The next pooled testing is scheduled for the week of Feb. 1. Results of pooled surveillance testing will be shared as they are reported back to campus from Upstate Medical.

We encourage you to take steps daily to ensure the safety for you and all around you. Many areas of the state are seeing strong post-holiday upticks in cases, including Clinton County.

Wear a mask, practice social distancing, wash your hands, avoid large social gatherings, and stay home when sick.

We will resume regular reporting and COVID-19 updates when the build-up to the spring 2021 semester begins. We respect the privacy of those in isolation and quarantine and will support them. If you are aware, please also respect their privacy.

Dr. Alexander Enyedi
