COVID-19 | Saturday Update

Feb. 13, 2021

Dear Campus Community,

The college recorded three new positive student COVID-19 cases on Saturday. The results include a single positive sample from Tuesday's pooled surveillance testing and two separate tests.

Over the past 14 days, 12 total cases have been recorded. Based on state travel regulations or public health guidance, nine students are in quarantine.

Pooled surveillance testing yielded no positive results from Monday and the one from Tuesday. Results from other testing days will be shared when available.

Specific pooled test results are reported to students, faculty and staff directly only if they are part of a positive pool. Reflex testing is then used to determine who may actually be positive, and center staff notifies all contacted individuals of their reflex testing results when available from SUNY Upstate Medical.

Overall pool testing results are then shared with campus. More information is online at plattsburgh.edu/COVID-19.

We respect the privacy of those in isolation and quarantine and will support them. If you are aware, please also respect their privacy.

We encourage you to take steps daily to ensure the safety for you and all around you. Wear a mask, practice social distancing, wash your hands, avoid large social gatherings, and stay home when sick.

Dr. Alexander Enyedi
President
