Dear Campus Community,

The college recorded 11 positive student COVID-19 cases on Saturday, all but one from the pooled testing samples taken this past week.

All 3,018 samples from this week’s pool testing have now been analyzed. Specific pooled test results are reported to students, faculty and staff directly only if they are part of a positive pool. Reflex testing is then used to determine who may actually be positive. Center staff then notifies all contacted individuals of their reflex testing results when received from SUNY Upstate Medical.

Over the past 14 days, 45 total cases have been recorded. Based on public health guidance, 46 students and employees are in quarantine. We respect the privacy of those in isolation and quarantine and will support them. If you are aware, please also respect their privacy.

Our regular, required testing is working, enabling us to aggressively identify and isolate positive cases. We encourage you to take steps daily to ensure the safety for you and all around you. Wear a mask, practice social distancing, wash your hands, avoid large social gatherings, and stay home when sick.

More information is online at plattsburgh.edu/COVID-19.
