Dear Campus Community,

The college recorded five positive COVID-19 cases on Monday. Over the past 14 days, 59 total cases have been recorded, with 16 cases active and 43 recovered.

Based on public health guidance, 10 students are in quarantine -- three on-campus and seven off-campus. We respect the privacy of those in isolation and quarantine and will support them. If you are aware, please also respect their privacy.

The college is looking to host an on-campus vaccine clinic again. Vaccine appointments can also be booked by employees and students near the airport or at Clinton Community College. State (https://covid19vaccine.health.ny.gov/) and Clinton County (http://www.clintonhealth.org/covid19vaccine/) web pages provide details.

Reminder: SUNY Upstate Medical University reports pooled test results directly to students, faculty and staff via email when they are completed. These come to your registered email address. You will be given a link to follow, log in, and see your result. It will be either presumed negative or positive.

If your result is presumed negative, you need take no further action. If your result is positive, you will be contacted by the Student Health and Counseling Center or the Clinton County Health Department with further details. If you get the notification email before being contacted, we ask you to self-isolate and contact your health care professional or the health center at 518-564-2187 or healthcenter@plattsburgh.edu.

We encourage you to take steps daily to ensure the safety for you and all around you. Wear a mask, practice social distancing, wash your hands, avoid large social gatherings, and stay home when sick. More information is online at plattsburgh.edu/COVID-19.
