COVID-19 | Tuesday Update

April 13, 2021

Dear Campus Community,

The college recorded one positive COVID-19 case on Tuesday. Over the past 14 days, 58 total cases have been recorded, with nine cases active and 49 recovered.

Based on public health guidance, nine students are in quarantine -- one on-campus and eight off-campus. We respect the privacy of those in isolation and quarantine and will support them. If you are aware, please also respect their privacy.

SUNY Upstate Medical University reports pooled test results directly to students, faculty and staff via email when they are completed. These come to your registered email address. You will be given a link to follow, log in, and see your result. It will be either presumed negative or positive.

If your result is presumed negative, you need take no further action. If your result is positive, you will be contacted by the Student Health and Counseling Center or the Clinton County Health Department with further details. If you get the notification email before being contacted, we ask you to self-isolate and contact your health care professional or the health center at 518-564-2187 or healthcenter@plattsburgh.edu.

We are uncertain whether another campus vaccine clinic will be added this semester. SUNY, following the recommendation of the U.S. FDA, CDC, and the state Department of Health, has paused administering the Johnson & Johnson one-shot vaccine pending further review. State (https://covid19vaccine.health.ny.gov/) and Clinton County (http://www.clintonhealth.org/covid19vaccine/) web pages provide details of other local vaccine appointments.

We encourage you to take steps daily to ensure the safety for you and all around you. Wear a mask, practice social distancing, wash your hands, avoid large social gatherings, and stay home when sick. More information is online at plattsburgh.edu/COVID-19.
