COVID-19 Update and Fall Departure Testing
Nov. 9, 2020

Dear Campus Community,

The college recorded four new COVID-19 cases on Monday.

Over the past 14 days, 18 total cases have been recorded. Additionally, two students are in precautionary isolation having tested negative with rapid tests but awaiting back-up PCR test results.

By direction of the county health department, 58 students (33 on-campus and 25 off-campus) and eight employees are in mandatory or precautionary quarantine. Those in isolation and quarantine are being released as they recover and risk times expire.

We respect the privacy of those in isolation and quarantine and will support them. If you are aware, please also respect their privacy. Decisions by the health department for quarantine are based on an assessment of potential exposure to help prevent possible viral spread.

Fall Departure Testing
Mandatory COVID-19 testing for departing students is being conducted this Wednesday through Friday, Nov. 11-13.

Students taking at least one in-person class, utilizing services on campus or working on campus must be tested prior to leaving. Exceptions to the requirements are outlined in the plan, online at plattsburgh.edu/COVID-19.

Questions about documentation and related requirements should be directed to the Student Health and Counseling Center at healthcenter@plattsburgh.edu. Please note that when the campus learns of a student’s failure to follow the above requirements on fall departure testing, their case will be referred to the Student Conduct Office.

Maintain Health and Safety
The region and nation are seeing high numbers of new cases. In the final two weeks of the on-campus fall semester, it is important for each of us to maintain a focus on prevention, health and safety. This includes:

- Complete the daily health screening form.
- Follow the Cardinal Pledge, including face coverings, distancing and avoiding large social gatherings.
- Stay local and avoid travel outside the area for the duration of the semester.
- Download the New York State COVID-19 alert app.
