COVID-19 Cases | Pooled Testing Results | Saturday, Jan. 9

Dear Campus Community,

The college has recorded three new COVID-19 cases from among the 520 pooled surveillance testing samples taken Tuesday -- two employees and an off-campus student. An on-campus student case was also identified through separate testing.

Inclusive of these, the college has recorded six total cases over the past 14 days.

The next pooled testing is scheduled for Tuesday, Jan. 19. Results of pooled surveillance testing will be shared as they are reported back to campus from Upstate Medical.

We encourage you to take steps daily to ensure the safety for you and all around you. Many areas of the state are seeing strong post-holiday upticks in cases, including Clinton County.

Wear a mask, practice social distancing, wash your hands, avoid large social gatherings, and stay home when sick.

We will resume regular reporting and COVID-19 updates when the build-up to the spring 2021 semester begins. We respect the privacy of those in isolation and quarantine and will support them. If you are aware, please also respect their privacy.
